Summary

Environmental Engineer with a specialization in Software Development, focused on fronted development and experienced in using technologies such as HTML, CSS, JavaScript, TypeScript, React, React Query, React Router, React Native, Zustand, SQL and Git

I have contributed to projects by developing dynamic and user-focused interfaces (UI/UX), applying best practices and ensuring high- quality solutions aligned with project objectives

With a strong commitment to continuous learning and professional growth, I aim to deliver scalable, efficient, and impactful solutions whitin collaborative development teams

I am constantly seeking scalable solutions with great impact and high quality, applying best practices and design patterns that align with the business vision and company objectives, paying close attention to details and the performance of each application.

Work Experience

Ecosystems Tech

Remote, Bogotá

JUNIOR FRONTED DEVELOPER

Oct. 2023 - Oct 2024

- Developed key features for an e-commerce platform focused on eco-friendly products, using React, React Router, and React Query.
- Implemented a state management system with Zustand, optimizing performance and simplifying the codebase.
- Enhanced the user experience by creating intuitive and visually appealing interfaces in alignment with modern UI/UX principles.
- Worked closely with a cross-functional team to optimize database queries with SQL, improving data retrieval times by 15%.
- Took ownership of debugging and troubleshooting frontend issues, ensuring smooth application functionality.
- Resolved complex technical inquiries for internal and external clients, ensuring customer satisfaction and adherence to SLA agreements.
- Led internal process improvements, reducing response times by 20%.
- Collaborated with remote and multidisciplinary teams to address and resolve technical support issues efficiently.
- Implemented basic automation scripts, decreasing manual task time by 15%.

GreenTech Solutions

Remote, Bogotá

Trainee Fronted Developer

Mar. 2023 - Oct. 2023

- Participated in the development of an internal dashboard to monitor environmental data, such as carbon emissions and water usage, using HTML CSS and JavaScript.
- Collaborated with the backend team to integrate APIs for real-time environmental data visualization.
- Contributed to improving the user interface by implementing responsive design techniques, ensuring compatibility across device
- Learned and applied version control practices whit Git, streamlining the team's collaboration process
- Prioritized and managed critical incidents based on their business impact, ensuring timely resolution.
- Provided training and mentorship to team members, enhancing service quality and knowledge sharing.
- Utilized SQL to analyze data and identify patterns in recurring incidents, improving troubleshooting processes.

Education

Cooperative University of Colombia

Bogotá, Colombia

Environmental Engineer with a specialization in Software Development

Jan. 2019 - Sep. 2024

Academia Hola Mundo (Nicolas Schurman)

Remote

Software Development, Backend And Frontend Development

JavaScript, NodeJS, HTML, CSS

TypeScript, React, React Query, React Router, Zustand.

SQL, Git+Github

Jan. 2023 - Dec. 2023

Skills

Front-end HTML, CSS, JavaScript, Zustand, ReactJS, Tailwind,

DevOps AWS, Docker, Jenkins, SonarQube

Programming Node.js, TypeScript
